

## BUSINESS INTELLIGENCE (BI)

# VEHICLE MANUFACTURE

Providing data and analysis to the motor insurance stakeholders is a key service provided by the MRC. Using our BI data repository, the MRC provides a business intelligence tool to all its stakeholders to allow analysis, benchmarking and immediate claims performance monitoring.

## WHAT IS BI

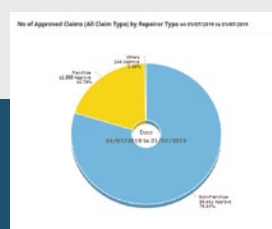

Assisting vehicle manufacture companies, ICAP BI presents industry data for claims, business analyst and marketing teams to analyse performance, areas for improvement and to ensure they have essential cost per vehicle data.

In addition, BI being a consolidated data repository also allows it to provide up-to-date data feed to any fraud detection by any insurance or any regulatory body. For vehicle manufacturers, BI provides the ability to identify vehicle parts supply leakage, price comparisons and assists on accurate parts price setting to ensure the vehicle has the best opportunity to repaired correctly.

## BENEFITS

The benefits from the BI system are:

1. MRC is the **ONLY** place where the complete industry Big Data for motor insurance repair claims is held.
2. It is used as a tool to identify the areas of weaknesses and any untoward or unusual occurrences.
3. Provides up-to-date data claims to core systems by any related body.
4. Real time data platform that automates compliance reporting to meet the needs of all stakeholders.
5. Generate faster reporting for better analysis.

# MODULES AVAILABLE FOR VEHICLE MANUFACTURE
